

What's new?

Abstract of new features

SafeNet 10

The dashboard

Use the dashboard to show you information concerning the inventory and activities of your safe deposit system(s) at a glance.

Which exact information will be visible and in which arrangement is your own decision. At this point you will use widgets which are information units that can be arranged and managed as groups in the individual little windows within your dashboard.

As a matter of course you can edify several groups separated by topics, for example.

The screenshot displays the SafeNet 10 dashboard interface. At the top, there is a navigation bar with the SafeNet logo, user information (Web-Portal 10.0: guest), and various menu items like Easy mode, SDL systems, Dashboard, Devices, Statistics, Event monitor, Maps, Help, and Logoff. Below the navigation bar, there are several dashboard widgets:

- Events:** A table showing a list of events for an "SDL system in London". The table has columns for SDL, Time, Customer, User, Event, and Text. The events include driver diagnosis, SDL release revoked, SDL closed, and SDL open.
- System state:** A widget showing the current status of the "SDL system in London". It includes a green status indicator, the time (8/5/2016 15:59:18), system status (Running in self service mode), and various counts for Released, Open, Defect, and Blocked SDLs, as well as SDL alarms and Free disk space (18%).
- Insurance sum:** A widget showing the insurance sum for the "SDL system in London". It displays a value of 0.00 (max. 0.00) for the system.

Data export in Excel format

Besides the well-known printing gauge in PDF format you can now also download the report results as an Excel chart in the xlsx format and continue processing it directly with your spreadsheet analysis.

Monitoring for safe deposit systems

Supervise the incidents in your safe deposit system on a technical level. As soon as any events occur that require intervention, repair or maintenance, these can be traversed into configurable incident groups and commented on. A technician or administrator can work with these incidents and initiate suitable actions.

The screenshot displays the SafeNet 10 monitoring dashboard with the following sections:

- aktiv Fächer**: Overview of active folders.
- Systems currently serviced**: Overview of systems currently being serviced.
- Nicht verbundene Anlagen**: Overview of disconnected systems.
- Systems out of order**: Overview of systems that are out of order.
- Angemeldete Benutzer (1)**: Overview of logged-in users, showing one user: SRV Angemeldete Benutzer.
- Alarms (106)**: A list of alarm events, including:
 - SDL system in London - SDL 10 Allgemeiner Alarm aufgetreten
 - SDL system in Liverpool - SDL 1316 Allgemeiner Alarm aufgetreten
 - SDL system in Birmingham - SDL 19 Allgemeiner Alarm aufgetreten
 - SDL system in Birmingham - SDL 18 Allgemeiner Alarm aufgetreten
 - SDL system in Liverpool - SDL 44 Allgemeiner Alarm aufgetreten
 - SDL system in London - SDL 63
- Errors (42)**: A list of error events, including:
 - SRV A general error has occurred A1
 - SDL system in Liverpool Ein allgemeiner Fehler ist aufgetreten
 - SDL system in London Ein allgemeiner Fehler ist aufgetreten
 - SDL system in Birmingham Ein allgemeiner Fehler ist aufgetreten
 - DSR23 Emulation - Conners Hill 37
- Warnings (25)**: A list of warning events, including:
 - SRV A general warning has occurred G2-00010
 - SDL system in Liverpool Allgemeine Warnung
 - SDL system in London Allgemeine Warnung
 - SDL system in Birmingham Allgemeine Warnung
 - DSR23 Emulation - Conners Hill 37
- Alle Events vom Systemstart (4)**: Overview of all events since system start.
- Connection problems (18)**: Overview of connection issues, including:
 - G2-00003 No still alive received
 - G2-00005 No still alive received
 - G2-00007 No still alive received
- Alle Events (75)**: Overview of all events, including:
 - SDL system in London Alle Events
 - SDL system in Liverpool Alle Events
 - SDL system in Birmingham
- Job Aktivitäten (1)**: Overview of job activities, including:
 - SRV Job meldet Information
- Job activity (1)**: Overview of job activity, including:
 - SRV Job Termineted with errors
- Technical support**: Overview of technical support requests.
- Help desk**: Overview of help desk tickets.

Acoustic alarms in Easy Mode

Let yourself be informed acoustically at occurrence of an alarm. For the utilisation of the Easy Modes a customer specific sound file in mp3 format can be deposited. It will be play-backed as soon as the alarm occurs.

Numerous more new features and improvements await you in SafeNet 10.

Detailed information can be found in the release notes of each published version.
